CORONA   WEST COAST   2 March 1965

14 000995520

SPS recommended installing a 1004 data link between AP Facility
and Vandenberg AFB for cutting tape for payload programmer.
Currently they were driving from the AP Facility to VAndenberg
by car with punch cards. It was also felt that a 5th cryp-
tographer at AP was needed and a second at VAFB, plus
one more commo tech.

NRO review(s) completed.
